

Safe Travels

Ultimate visibility with
Remote Container Management

Your promise. Delivered.

Remote Container Management for Pharmaceuticals

The relationships you have with your pharmaceutical partners are about more than good chemistry. A secure, reliable means of transportation is a crucial part of the equation that allows you to support, design and safeguard your supply chain.

Now you get ideal conditions to do just that. Remote Container Management is our groundbreaking technology that gives you full visibility of your pharmaceutical cargo's journey.

From temperature records to location tracking, you get tangible proof of the handling of your pharmaceutical products, enabling you to comply with good distribution practices.

The Remote Container Management platform, available online whenever you need it, equips you with data and documentation to present to your partners, distributors and local authorities. It lets you monitor the state of the high-value products you're transporting, and it gives you an unbroken data chain for insurance and product quality.

5 benefits with Remote Container Management

1

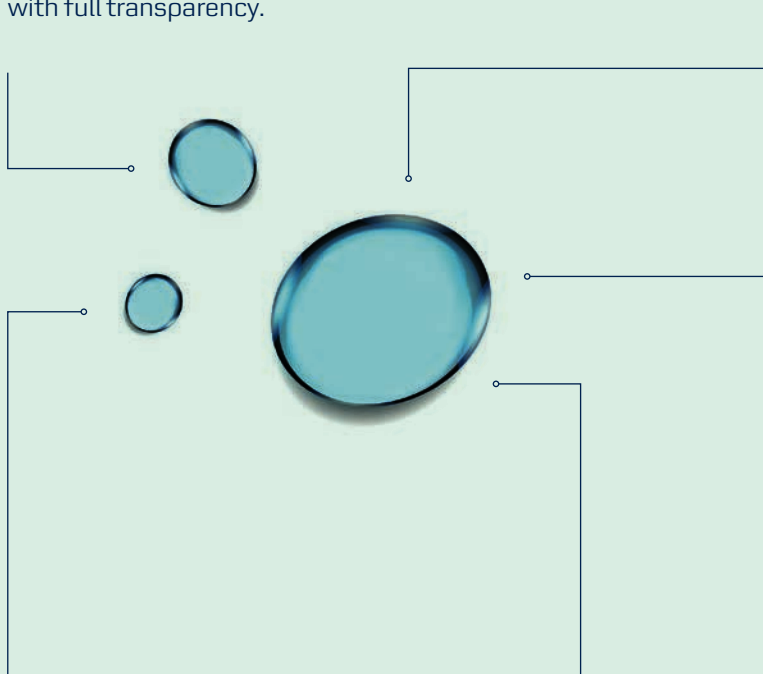

QUALITY MANAGEMENT SYSTEM

We ensure that our Quality Management System follows and supports your requirements. Remote Container Management provides you with tangible proof to meet regulatory requirements and strict quality demands. As a part of our Quality Management System, we have consolidated our operational procedures to provide you with full transparency.

2

SUPPLY CHAIN VISIBILITY

Remote Container Management ensures that all vendors in your supply chain are held accountable to their promises. You can check that your cargo was kept at the exact settings you requested throughout its entire journey.

3

LOCATION-TRACKING OF YOUR CONTAINER

With Remote Container Management you always know the location of your container and how many days it has been traveling. This assist you to ensure that your pharmaceutical product has been securely transported without route deviation and additional risk. Additionally, location-tracking provides records in cases of theft and tampering.

4

RELATIONSHIP CARE

Knowing the state of your cargo before it arrives gives you ideal conditions to maintain and develop your partnerships. Using data provided from the Remote Container Management platform you can ensure that the proper corrective and preventive actions have been put in place, making sure the transportation meets your requirements.

5

PEACE OF MIND

The Remote Container Management dashboard produces a clear insight into the state of your cargo. This means that your planned risk assessment on routes has been executed.

**That's what we call
safe travels.**
