

03/08/2026

Dear Valued Customer,

Please be advised that, following a decision by the Hungarian Government to introduce energy saving measures, cargo train operations will be required to stop daily between 17:00 and 22:00 starting from 03 August 2026 until further notice.

As a result, rail shipments moving between seaports and Budapest intermodal terminals may experience extended transit times in both import and export directions.

Customers should anticipate potential delays in container arrivals and departures as well as consider the impact when planning cargo movements and delivery schedules.

Maersk is closely monitoring the situation and will continue to provide updates as more information becomes available.

We appreciate your understanding and cooperation.

Kind regards,
Maersk Hungary
