

## Service Mode

### Interpretation by CUSTOMS:

Service Mode	Considered as
CY-CY	FCL
CFS-CY	FCL
CY-CFS	LCL
CFS-CFS	LCL

**FCL/Part:** When there more than one consignment loaded in a single box and all the consignments are consigned to same consignee, manifest can be submitted as CY-CY (aka FCL) but since the container is available under more than one BL, manifest must be submitted as '**PRT**' for the container under all the BLs'. This mode is known as **FCL/PART**.

### Service Mode Acceptability:

Container	BL/Consignment	Shipper	Consignee	CY-CY	CY-CFS
1	1	Single	Single	<b>Y</b>	
1	More than 1	Single	Multiple but same	<b>Y</b>	
1	More than 1	Single	Multiple & Different		<b>Y</b>
1	More than 1	Multiple & Different	Multiple & Different		<b>Y</b>

**Exception:** If Consignee is a **Freight Forwarder** (with AIN Number), following is acceptable:

Container	BL/Consignment	Shipper	Consignee	CY-CY	CFS-CY	CY-CFS	CFS-CFS
1	1	Single	Single	<b>Y</b>	<b>Y</b>	<b>Y</b>	<b>Y</b>

### Important Notes:

- Following BL & Container Combination is unacceptable as one BL contains 2 containers (1 LCL & 1 FCL). It is not allowed to declare two service different service modes for two different containers.

#### Unacceptable:

BL: MCDXXXXXX; Consignee: A Company; Container: **MRKUXXXXXXX**, MSKUXXXXXX (2 Containers)

BL: MCDYYYYYY; Consignee: B Company; Container: **MRKUXXXXXXX** (1 Container only)

#### Should Be:

BL: MCDXXXXXX; Consignee: A Company; Container: MSKUXXXXXX, Service Mode: CY-CY

BL: MCDXXXXXX; Consignee: A Company; Container: **MRKUXXXXXXX**, Service Mode: CY-CFS

BL: MCDYYYYYY; Consignee: B Company; Container: **MRKUXXXXXXX**, Service Mode: CY-CFS

- While any manifest amendment is requested by consignee for inclusion of Split BL, no matter if the consignee is the same or not, Service Mode of all related BLs' must be CY-CFS. This is a clear guideline by Customs and they won't accept any amendment request with service mode CY-CY
