

MARKETING CIRCULAR
14 DECEMBER 2020
PPA RULE ON EXPORT (LADEN / EMPTY) CONTAINERS

We would like to remind port users on the implementation of the PPA mandated shut out charges on: (1) Change of exporting vessel where the container/s is/are intended to be loaded; (2) Change of exporting vessel where the container/s is/are intended to be loaded; and, (3) Change in weight of container/s as previously declared in ATI Batangas Container Terminal.

Currently, shippers declare the Verified Gross Mass (VGM) during Export Pre-Advice. At the terminal gate during entry, export containers are weighed. Please note that applicable PPA imposed charges will be implemented for any weight discrepancy beyond the tolerance of +/- 1,500 kilograms (1.5 metric tonnes) between Shippers Declared VGM and Measured Weight upon arrival at the gate.

Rest assured that this is implemented for the safety of ships and proper vessel stowage en route to destination.

Thank you very much for your continued support and patronage!
