MAERSK

ALL THE WAY

Your journey to GHG emissions reductions starts here

with **Maersk ECO Delivery Ocean**

Reducing greenhouse gas (GHG) emissions across your supply chain is no longer a nice-to-have, it's quickly becoming a staple requirement. That's where shipping your goods with Maersk ECO Delivery Ocean can help!

Maersk ECO Delivery is an emissions accounting mechanism that allocates energy from lower GHG emissions fuels* to cover the consumed energy of fossil fuels in the transportation of cargo. Our offering replaces some or all fossil fuels with lower GHG emissions fuels, such as those based on bio-waste feedstocks. You have the flexibility to choose a fossil + alternative fuel blend that aligns with your budgets and priorities.

**Maersk defines reduced / lower GHG emissions fuels as fuels with at least 65% reductions in GHG emissions on a lifecycle basis compared to fossil of 94 g CO2e/MJ*

Simple to adopt, easy to deploy

Our solution seamlessly fits into your existing ocean transport plans and you'll get a Maersk ECO Delivery CO2e Savings Certificate to highlight your decarbonisation efforts.

STEP 1 — Select Maersk ECO Delivery Ocean at the time of ocean transportation contracting or at any time during the term of an ocean service contract.

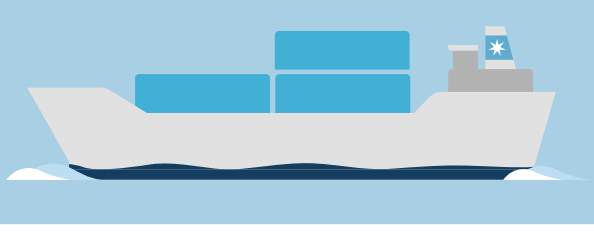
STEP 2 — Select from 4 alternative fuel option based on your specific requirements, priorities and budgets.

STEP 3 — Based on your selection criteria (e.g. geography or trade), the respective amount of lower GHG emissions fuel is burned in Maersk's network. In addition, you will receive a proportional discount on the Emission Surcharge (ESS/EMS).

STEP 4 — The emissions reductions attributed to you are summarized in a Maersk ECO Delivery CO2e Savings certificate issued once a year, upon request.

Option 1

Alternative fuel allocated	**10%**
GHG emission reductions (CO2e)	**8.51%**



Option 2

Alternative fuel allocated	**25%**
GHG emission reductions (CO2e)	**21.29%**

Option 3

Alternative fuel allocated	**50%**
GHG emission reductions (CO2e)	**42.58%**

Option 4

Alternative fuel allocated	**100%**
GHG emission reductions (CO2e)	**85.17%**

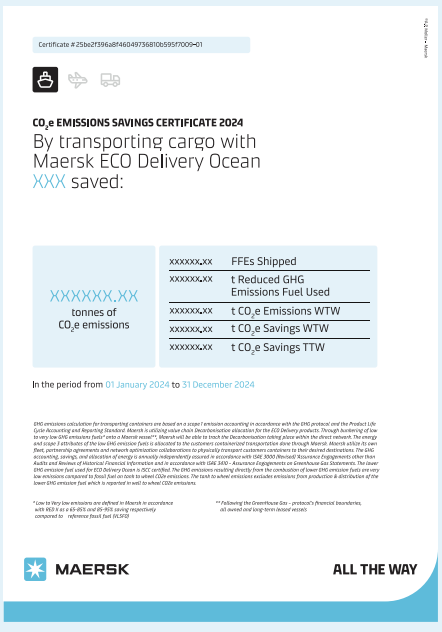
compared with fossil reference fuels

What does your CO2e certificate contain?

The Maersk ECO Delivery CO2e certificate documents how many tonnes of GHG emissions you have saved, based on what would be the actual fossil fuel equivalent GHG emissions incurred during your goods' transportation journey.

The certificate includes the amount of lower GHG emissions fuel used, FFEs shipped, CO2e savings Well-to-Wake and Tank-to-Wake, date range, unique certificate number and your GHG emissions from the lower GHG emissions fuels used.

Maersk's lower GHG emissions fuels and their supply chains are certified by the International Sustainability and Carbon Certification (ISCC) and Proof of Sustainability documentation are issued.



Certificate # 25be2f396a8f4604973681 0b595f7009-01

CO_2e EMISSIONS SAVINGS CERTIFICATE 2024

By transporting cargo with Maersk ECO Delivery Ocean XXX saved:

XXXXXX.XX tonnes of CO_2e emissions

xxxxxx.xx	FFEs Shipped
xxxxxx.xx	t Reduced GHG Emissions Fuel Used
xxxxxx.xx	t CO_2e Emissions WTW
xxxxxx.xx	t CO_2e Savings WTW
xxxxxx.xx	t CO_2e Savings TTW

In the period from 01 January 2024 to 31 December 2024
